## Helukabel SOLARFLEX H1Z2Z2-K

|                          |                           |
|--------------------------|---------------------------|
| Výrobca                  | <a href="#">HELUKABEL</a> |
| Typ vodiča               | fotovoltaický             |
| Druh jadra               | Cu, pocínované            |
| Žila                     | lanko                     |
| Pracovná teplota         | -40...90°C                |
| Počet žíl                | 1                         |
| Norma CPR                | D <sub>ca</sub>           |
| Použitie                 | fotovoltaika              |
| Materiál izolácie vodiča | polyolefín                |
| Druh materiálu           | bezhalogénový             |

| Symbol                            | Druh vodiča/kábla                           | Men. nap.<br>[kV] | Farba izolácie | Vonk. priem. kábla<br>[mm] | Trieda pružnosti | Prierez jadra<br>[mm <sup>2</sup> ] |
